Hi Kelly,
We checked the databases we had access to and can provide the following:

Intra Services is registered as a generator, transporter, and transfer facility. Compliance rating is "high."

Intergulf is registered as a generator, transporter, receiver, transfer facility, and has a permit. Also "high" compliance rating.

Delta Water Processing is a generator, recycler, receiver, "unclassified" compliance rating.

These 3 should be acceptable.

We were asked about Cameron and Mauser on May 2. Here's what we found then:

Cameron (swr# 96890) is actually Cameron Auto Salvage per Central Registry. Looks like they basically just have a bunch of stormwater permits and that swr# is as a transporter. But most scrap metal drops out of regulation as a solid waste so, this one should be acceptable.

Mauser packaging (swr# 33930) is registered as a generator only. They haven't notified of or been authorized for receiving anything.

Scott was able to look up this information. The Region or Enforcement may have more updated info than we can access. Please let me know if we can help in any other way.
Thank you,
Bob

All, Can you please let me know if we have any concerns for the 3 facilities listed below. Same CERCLA Off-Site check as we conducted on Wednesday for Southwest Shipyard. Thanks.
